# EFFICIENCY, QUALITY & COST

We know that driving quality and controlling costs is a constant headache in the world of remote sites whether in Oil & Gas, onshore, offshore, Military, Mining or Construction.

We also know the critical importance of compliance from not just a healthy and safety perspective but adherence and monitoring of key performance indicators and contractual obligations.

Our team has a world of experience working with every aspect of camp management operations globally - from the UK, the North Sea, across Europe, Africa, Asia, Australasia, the Middle East, North and South America - from arctic conditions, to the desert, to elevated remote sites, to military camps, war zones and to large civil engineering and reconstruction projects.

4xi is a global consulting firm, headquartered in the United States but our team has an unprecedented depth of global experience in the employee experience, food, facilities, and amenities. We are now leveraging this breadth and depth of expertise to help and support the remote site markets globally.

We fully appreciate that as the Client, your core business is not Facilities Management.

**Are you getting value for money from your Contractor in your camp and office operations? Are you comfortable with the following aspects of your operation?**

- On-site operations and performance reviews including quality of service and cost?
- Visibility of key performance indicators in the Contractor operation?
- Have you access to auditing technology to monitor performance 24/7 wherever you are?
- That your people are getting the best possible experience they can?
- Comfort in the knowledge you are getting value for money and best-in-class service?

# VISIBILITY, ACCOUNTABILITY & CONTROL

## ON-SITE OPERATIONS & PERFORMANCE REVIEWS

As subject matter experts in the remote site business, we will be able to give advice on costs and quality based on experience and knowledge, to ensure the client gets value for money. Using our clear understanding of requirements, we can look to improve the quality of service and costs. You will be happy and so will your staff.

## TECHNOLOGY THAT FACILITATES 24/7 VISIBILITY

4xi provides a robust tool that helps your team complete important onsite inspections, checklist and forms. Quickly capture information on site, follow-up on issues, analyze results and improve your business. This technology is used onsite and remotely, and users will be trained in how to get the best results from this tool.

## MONITORING & AUDITING PERFORMANCE

We will ensure your Contractor are held accountable for the services and HSE compliancy in line with the Scope of Work. It is a proven fact that independent auditing pays dividends for Client. This would include:

- Daily audits of service points to ensure full compliance with scope
- Weekly checks of purchasing and inventory
- Staffing performance and compliance
- Contract and Statement of Work compliance
- Scheduled performance meetings with contractor(s)
- Key Performance Indicator scorecards

# NEW CAMPS & CONTRACTOR SELECTION

Let us help you design, plan, and facilitate the set up of your new camp requirements no matter what or where they are.

Through our decades of combined experience, 4xi can help you take away the headache of establishing a new camp fit for your project needs, location and duration.

## STATEMENT OF WORK

Understanding the project requirements and accurately articulating your needs into a Statement of Work is a critical first step to ensure long term partnership success.

## EVALUATION

We will evaluate technical proposals from potential operating partners and ensure that they are fully compliant and technically capable to deliver the requirements.

## FINANCIAL PROPOSALS

Evaluate, compare, and contrast supplier financial proposals, including stress testing. Ensuring that you are getting best value for money.

## PERSONNEL

Ensuring that the right people are in the right roles, with the right experience, and with the required qualifications and permits.

# LOCAL TERMS, COMMUNITIES & ENVIRONMENT

We also know that its not just about getting the job done, we need to make sure that local government and regional laws and regulations comply, as we do need to support local communities and the environment.

Through our decades of combined experience, 4xi can help you take away the headache of establishing a new camp fit for your project needs, location and duration.

## REGULATIONS

In many countries it is now necessary to have a local partner who has a major shareholding in the company. Just having a registered foreign subsidiary is not enough in most cases. Does the potential Contractors have a track record in the country? Do they have a working Supply Chain in place?

## COMMUNITY

- Jobs for local staff with succession plans for supervisory positions
- Engaging with community leaders for the benefit of the local people
- Assisting with agriculture projects in the communities
- Education of children in the communities
- Supporting women to work or into business

## ENVIRONMENT

- Recycling of waste from the operation. Plastic, cans and tins, general waste.
- Reuse of food waste for compost and use in agriculture projects.

We all know...you can't fix what you can't see.

Effectively managing dispersed operations and delivering high value to clients and customers means you need to know what's going right (...and what's not), before it costs you business. But with so many locations and such little time, how do you see what's really happening at each site and make sense of it all?

MyFieldAudits' mission is to give operators clear visibility into their onsite businesses while delivering the "Need-to-know" to make informed, impactful decisions. To do this, we've developed a powerful suite of robust tools that engage onsite teams, leadership and clients to provide a real-time window into the soul of your business. Simple, clear dashboards and benchmarking reports help you and your clients know exactly where each location stands.

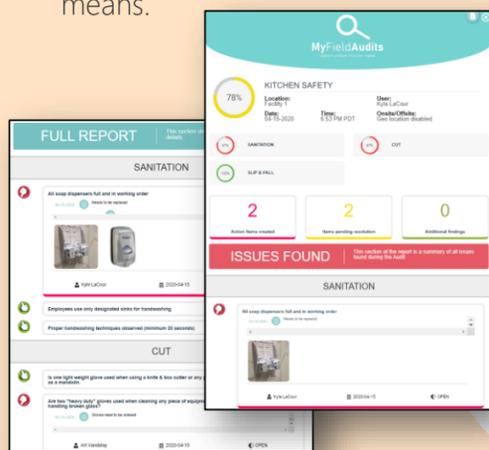

Whether it's quality checks, regulatory compliance or training and brand standards, MyFieldAudits makes it easy for your entire team to own quality & ensure it's delivered.

A better way to manage...

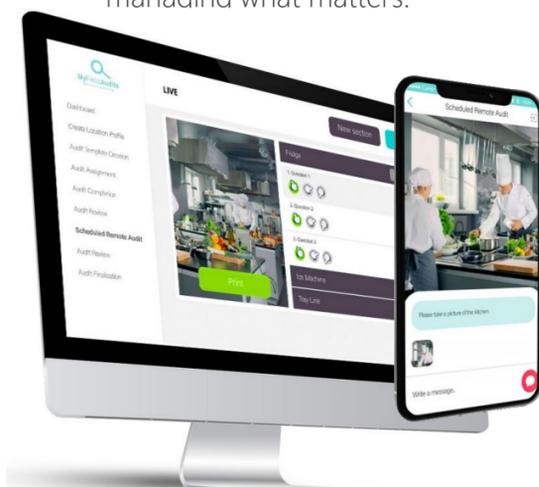

**Powerful Visibility**

See what's truly happening onsite – benchmark your locations (and clients) to provide context what performance means.

**Remote Oversight**

Skip the trip – our remote inspection platform means less time traveling and more time managing what matters.

**Innovative Compliance & QA**

We custom craft effective technology solutions that engage your team and clients to provide honest results that ensure everyone owns quality
